

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

EDITORIAL COMMITTEE: S. NEWCOMB, Mathematics; R. S. WOODWARD, Mechanics; E. C. PICKERING, Astronomy; T. C. MENDENHALL, Physics; R. H. THURSTON, Engineering; IRA REMSEN, Chemistry; JOSEPH LE CONTE, Geology; W. M. DAVIS, Physiography; O. C. MARSH, Paleontology; W. K. BROOKS, Invertebrate Zoology; C. HART MERRIAM, Vertebrate Zoology; N. L. BRITTON, Botany; HENRY F. OSBORN, General Biology; H. P. BOWDITCH, Physiology; J. S. BILLINGS, Hygiene; J. MCKEEN CATTELL, Psychology; DANIEL G. BRINTON, J. W. POWELL, Anthropology.

FRIDAY, JANUARY 25, 1895.

CONTENTS:

<i>The Past and Present of the American Mathematical Society:</i> EMORY MCCLINTOCK.....	85
<i>The Origin of our Vernal Flora:</i> JOHN HARSHBERGER	92
<i>On Certain Habits and Instincts of Social Insects:</i> MARCUS HARTOG.....	98
<i>The Proper Scientific Name for Brewer's Mole:</i> FREDERICK W. TRUE	101
<i>The American Folk-Lore Society:</i> D. G. BRINTON	101
<i>Scientific Literature:</i> —.....	102
<i>Poincaré's Les oscillations électriques (I.):</i> M. L. PUPIN. <i>Alexander's Engine Construction:</i> R. H. T.	
<i>Notes:</i> —.....	109
<i>Personal; General; Congresses; New and Forthcoming Publications.</i>	
<i>Societies and Academies:</i> —.....	110
<i>American Mathematical Society; Iowa Academy of Sciences.</i>	
<i>Scientific Journals</i>	112
<i>New Books</i>	112

MSS. intended for publication and books, etc., intended for review should be sent to the responsible editor, Prof. J. McKeen Cattell, Garrison on Hudson, N. Y.
Subscriptions (five dollars annually) and advertisements should be sent to the Publisher of SCIENCE, 41 East 49th St., New York.

THE PAST AND FUTURE OF THE AMERICAN MATHEMATICAL SOCIETY.*

HAVING been requested by the Council to address the Society on retiring from the presidency, it has appeared to me that I must choose between the discussion of the

*Address delivered by the retiring President, before the American Mathematical Society at the annual meeting held December 28, 1894.

position and prospects of some branch of mathematics with which I may be familiar and a more general and discursive review of the present position and future prospects of our Society. I have, after some hesitation, chosen the latter subject. It seems desirable, on the whole, that there should be made at this time some permanent record, however slight, of the steps by which so large and flourishing a society has come together, and of the views concerning its present scope and the hopes concerning its future possibilities which are entertained by those who have hitherto been most immediately concerned in the conduct of its affairs.

The New York Mathematical Society, originating in 1888, was at first not much more than a small mathematical club meeting periodically at Columbia College. The first meeting was called by a circular signed by three young men. The number of those who could be expected to attend these meetings was not great, but all who were able and who were sufficiently interested to do so were invited to join the Society. It was fortunate in securing for its first president Professor Van Amringe, distinguished alike by scientific attainments, official eminence, and administrative ability. The professor of astronomy at Columbia was also active in it from the first. The meetings of the young Society were, as I am informed (for at that time I did not reside in New York),
